

Dicamba

Dicamba is a synthetic auxin which acts as plant growth regulator. It is absorbed by leaves and roots and readily translocated throughout the plant via both the symplastic and apoplastic system. Dicamba is used to control annual and perennial broad-leaved weeds and brush species predominantly in maize, cereals and pasture.

It is often applied in combination with other herbicides because the product is an excellent tank mix partner.

- Action:**
- selective systemic
 - post-emergence application (weeds)

HRAC classification: O

CAS No.: 1918-00-9

Technical grade: min. 98%

Formulations: 480 SL

- Packaging¹:**
- 25 kg (tech.)
 - 200, 20, 5, 1 ltr. (form.)

Crops/Situation	Weeds	Dose rate ² g a.i./ha
Cereals	Annual and perennial broad-leaved weeds and brush species	110 – 140
Maize, Sugar cane		290 – 600
Pasture, Rangeland,		1010 – 2200
Non-crop		

¹upon request we provide customized packaging

²always follow national label recommendations
