

Mancozeb

Mancozeb is a contact fungicide that acts as a non-specific thiol reactant, inhibiting respiration. It controls a broad spectrum of fungal diseases (e.g. blight, leaf spot, rust) in a wide range of crops. Mancozeb is very often utilised in mixtures to combine its protective effect with some curative action (e.g. Cymoxanil, Metalaxyl).

For information about the coformulation of Mancozeb with Cymoxanil see page 44.

Action:

- systemic
- protective

FRAC classification: M

CAS No.: 8018-01-7

Technical grade: min. 85%

Formulations: 80 WP, 80 WG

Packaging¹: 25, 5, 1 kg (form.)

Crops	Diseases	Dose rate ² g a.i./ltr.
Apple, Pear	Anthrachnose (<i>C. lindemuthianum</i>), Fruit spot (<i>Mycosphaerella fragariae</i>), Scab (<i>Venturia inaequalis</i>)	2.7 – 5.4
Bananas	Yellow sigatoka (<i>Mycosphaerella musicola</i>), Black sigatoka (<i>M. fijiensis</i>)	1.5 – 3
Beans	Anthrachnose (<i>Colletotrichum lindemuthianum</i>), Rust (<i>Uromyces phaseoli</i>)	1.5 – 2.5
Grapes	Black rot (<i>Guignardia bidwellii</i>), Downy mildew (<i>Plasmopara viticola</i>), Blunch Rot	1.5 – 3.5
Potato	Early blight (<i>Alternaria solani</i>), Late blight (<i>Phytophthora infestans</i>)	0.5 – 2
Tomato	Anthrachnose (<i>Colletotrichum lindemuthianum</i>), Early blight (<i>Alternaria solani</i>), Late blight (<i>Phytophthora infestans</i>), Grey leaf spot, Septoria leaf spot, Leaf mould	1.3 – 2.7
Vegetables	Early blight (<i>Cercospora apii</i>), Downy mildew (<i>Peronospora destructor</i>)	1.3 – 2.7
